HIL dS Interface Type C

Plug-and-play interfaces for easy Rapid Control Prototyping

Application

The HIL dS Interface Type-C provides a ready-to-go interface between all Typhoon HIL emulators (4-Series and 6-Series) and the dSPACE's DS1104 controller with CP1104 control panel.

With a dSPACE 1104 as the controller, and any supported HIL device as the plant, you have a complete test bench for a multitude of applications: automotive, drives, or power electronics.

Features and Benefits

- Pinout 1-to-1 compatible with supported dSPACE hardware products
- Digital IO type settable via 32 SPDT switches
- LED indication of digital IO activity

Technical Details (short)

Designed for	dSPACE DS1104 with CP1104 connector panel
